

Construction & Installation

Ariosh has diversified experience in fabrication and installation. We deliver fabrication, construction, hook-up, and installation projects working with partners that extend our local capabilities.

By leveraging on our partner's assets; world-class construction facilities and equipment, we are fully equipped to deliver fabrication work with load-out capacity of up-to 5,000 metric tons.

These assets combined with our highly capable and experienced construction team ensure that a high quality service is delivered.

Whether the projects are large capital, small capital or packaged, single disciplined scopes, Ariosh approaches each with the same level of professionalism, integrity and a commitment to health, safety & environment where we operate.

- Wellhead, Processing & Living-quarters platforms
- Compression & Water injection modules
- Tank and Pressure Vessel
- Onshore Modules and LNG Plants
- Sub-sea Manifolds and Structure
- Riser, flowline and umbilical installation support
