

Procurement

Best price, optimal schedule, quality materials...

Ariosh delivers complete procurement solutions to oil field equipment including floating production and subsea production systems. We have longstanding global alliance and rich network of Original Equipment Manufacturers (OEMs), Authorised Distributors, Buying Houses, Third Party Inspectors and global Freight Forwarders. Ariosh local assets, capacity and industry knowledge complement our international alliance in materials procurement.

With a track record of several successful project materials delivery for our clients, Ariosh is a leader in providing turnkey procurement solutions covering strategic sourcing, materials management, contract management, materials inspection (quality assurance and quality control) services, warehousing and logistics optimization.

Global Strategic Sourcing

Through rich networks and global alliances, Ariosh teams of qualified buyers are able to source any material required by our clients from the right and trusted sources. We carefully select vendors and suppliers who share our passion for excellence and add value to our projects with a combination of right quality, optimal schedule, and best price.

Materials Management

Ariosh procurement team ensures that materials and equipment procured are received (identified and tagged), handled and stored correctly to prevent damage and their integrity preserved during delivery/transshipment to the warehouse, project site or offshore facility or other client's designated delivery location. Our materials management objective is to help minimize clients' total material costs through innovative planning and logistics systems. Our processes ensure seamless interface among procurement executives, material coordinators, QA/QC inspectors and logistics coordinators.

Supply Chain and Subcontract Management

Ariosh provides innovative contract management and control process solutions necessary to administer purchase orders and subcontracts. Our procurement team brings unparalleled leadership experience to developing proven supply chain solutions; ensuring efficient decisions which streamline the supply management process.

Inspection Services (Quality Assurance and Control)

Ariosh supports procurement projects with efficient inspection services in compliance with purchase order, client, and company requirements. Our Inspection Services team ensures quality with effective inspection task planning, efficient testing and reporting methods.

We organize, plan, execute, control and verify the quality of the work in accordance with clients requirements and Ariosh Quality Management System while continuously taking action to identify, report, correct and prevent nonconformity.

Warehouse and Logistics Optimization

Ariosh provides warehousing services and logistics optimization. Ariosh onshore logistics bases in Lagos and Onne (Port Harcourt) are equipped with world-class warehousing facilities to store and stock full range of products. We provides efficient, economic, and on time transportation services to difficult project locations. We utilize innovative resources and technology to produce the appropriate solutions allowing us to be proactive, avoid delays, and achieve the utmost desired client satisfaction.
